Minimum charter days: 5

Embarkation: 15h00, obligation to return to marina the day before till sunset Disembarkation: 08h00

Main base: Mahé, Seychelles

General information

The Seychelles is whole year destination. The climate is always warm and does not reach extremes of heat or cold. The temperature rarely drops below 24°C or rises above 32°C.

It is generally **cooler when the north-west trade winds blow** during the months of **November to March**. The sea is generally calm and the weather warm and humid, with **average winds of 15 - 22 kilometers per hour**.

From December to February you can notice a larger amount of the rainfall, compared to other months. It is also fairly cloudy at times during those months and therefore less sunshine. **The weather is hottest from December to April, and the humidity is high - often 80% or higher.**

The months of **May to October bring drier, cooler weather**, and livelier seas - particularly on south-eastern coasts – and winds of 19 -37 kilometers per hour are common.
